Termination of the Declaration of Force Majeure dated September 11, 2024

Dear Customer,
Dear Contractual Partner,

We, GRILLO Chemicals GmbH, hereby inform you that we are terminating the Force Majeure declared in our letter dated September 11, 2024, with regard to deliveries and services from our zinc sulfate, sulfur dioxide, and recycled acid plant as of December 1, 2025.

The necessary repair and reconstruction measures following the major fire on our company premises and the resulting failure of the production facilities for zinc sulfate, sulfur dioxide, and recycled acids have been completed. We are, therefore, now able to supply you with sulfur dioxide again, as well as to accept recycled acids and carry out recycling activities.

We would like to thank you sincerely for your understanding and support during this challenging time. Your patience and trust have contributed significantly to overcoming this difficult situation.

We are also pleased to announce that GRILLO will be making further significant investments in the modernization and optimization of our sulfur chemistry production facilities. These investments will not only ensure the stability of our supply chains but also enable us to offer you even better products and services in the future.

We look forward to continuing our successful cooperation.

Sincerely

Dr. Tilo Horstmann
Managing Director
