

**GRILLO****ZINC METALS**

Solutions that think ahead

# More efficiency, lower costs. It all starts with the right wire.

With the growing demand for film capacitors - not least due to the energy transition - the requirements for materials and processes are also increasing. With GRILLO, our customers not only receive high-quality wire - but also an active development partner who thinks ahead and drives things forward. Our goal is to sustainably increase the performance and efficiency of your production through innovative materials and optimized applications.

## We not only develop products: We develop progress.

### **New alloy - higher efficiency, consistent quality**

Together with you, we develop an alloy tailored to your requirements - whether zinc-tin, tin-zinc, zinc-aluminum or aluminum. Save costs while maintaining the same technical properties.

### **Standardized spray application - for more efficiency**

GRILLO is working with well-known manufacturers to standardize the spray application. The aim is to optimize wire application so that the spray coating is applied more precisely and evenly.

## The advantages of the GRILLO wire products

### **Cost savings**

Thanks to an alloy tailored to the customer's requirements, the costs for tube materials and processing can be significantly reduced in some cases - same performance, lower costs.

### **Processing safety**

All the alloys we develop have very good solderability, high wire strength and have been tested by us for use in spraying systems.

### **Greater efficiency**

Thanks to a more targeted spray layer, more material adheres to the condenser surface - less loss, more benefit.

### **Your process in focus**

## **Together we develop solutions that go further**

We see ourselves not only as a manufacturer of a high-quality product - we are your active development partner.

We actively support our customers - both in the selection and optimization of the wire used and in the further development of their production processes.

Our claim: Increase efficiency. Secure processes. Promote innovation.

### **Contact us now**

Contact us - we will be happy to advise you personally and show you how you can produce more efficiently, economically and future-proof with GRILLO.
